THE BEST AED JUST GOT EASIER

The revolutionary Powerheart AED G3 Automatic has arrived. The new patented Powerheart AED G3 Automatic delivers life-saving defibrillation therapy without the need to push a shock button. Once the defibrillation pads are attached to the patient, the device detects the patient's heart rhythm, analyzes the rhythm using patented RHYTHMx® analysis software, and, if a life-threatening rhythm is detected, instructs the user to stand clear and automatically delivers a defibrillation shock.

The new Powerheart AED G3 Automatic also features our industry leading RescueReady® technology which includes our patented daily, weekly, monthly self-testing, virtually guaranteeing first time, every time rescue performance. The Powerheart AED G3 Automatic also incorporates our advanced technology features such as RHYTHMx® analysis software and STAR® biphasic defibrillation energy waveform.
